## The Ultimate IQ Test

Congratulations, David!

Your IQ score is **131**

This number is the result of a formula based on how many questions you answered correctly on Emode's Ultimate IQ Test.

During the test, you answered four different types of questions — mathematical, visual-spatial, linguistic and logical. To determine your ability in these areas, we compared your answers to those given by the 6.5 million people who have taken Emode's Ultimate IQ Test.

The even better news is that Emode has taken intelligence assessment a step further than the rest, offering you insight no other IQ test can give. We have developed a reliable statistical algorithm that analyzes patterns in your response to determine the unique way that your brain functions, revealing your *Intellectual Type*.

Our analyses indicate that your Intellectual Type is: *Precision Processor*. This means that among other things, you have superior skill in mathematics.

But that's just scratching the surface. We have compiled a report with graphs and charts that detail information about your intellectual type as well as how you scored on those four subscales of intelligence. This [comprehensive report](#) will allow you to take full advantage of the investment you've made in taking Emode IQ test.

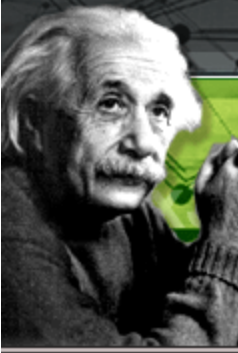

### In this report you'll find:

- The full answer key
- A detailed description of your intellectual type
- Charts and graphs that show how you scored along 4 distinct intelligence scales
- Your performance relative to how others scored
- A printable Certificate of Intellectual Achievement
- An inquiry into the true nature of intelligence
